Danunja Reddy Kota

Mylavaram, Andhra Pradesh, India · +91 9010693218 · danunjareddykota@gmail.com · github.com/danunjareddy · linkedin.com/in/danunja-reddy-kota

Summary

Aspiring Machine Learning Engineer with expertise in Python, Java, and AI/ML model development. Experienced in data collection, cleaning, and preprocessing, eager to contribute to innovative AI-powered solutions and enhance skills in backend development and scalable software systems.

Skills

Programming Languages	Java, Python
Cloud	AWS, IAM, EC2, S3, Cloud Security Basics
Machine Learning	Supervised Learning, Unsupervised Learning, Classification, Regression, Feature Engineering, Data Preproces
Deep Learning	CNN, Transfer Learning, Computer Vision, TensorFlow, Keras, OpenCV
Data Analysis	Python, NumPy, Pandas, Scikit-learn, Matplotlib, Jupyter Notebook
Version Control	Git, GitHub
Other Skills	Data Structures & Algorithms, Object-Oriented Programming, Debugging, Git & GitHub
Tools & Libraries	NumPy, Pandas, Scikit-learn, TensorFlow, Keras, OpenCV, Jupyter Notebook

Experience

Service Now Administrator 05/2026 – 07/2026
Smart Bridge *Remote*
- Managed and configured ServiceNow platform, enhancing IT service management through improved data handling and process automation.

Data Intern 04/2025 – 06/2025
Placemantra *Remote*
- Analyzed datasets using Python, NumPy, and Pandas to extract meaningful insights, supporting decision-making processes and improving model accuracy.
- Collaborated with a team on AI/ML projects, contributing to data preprocessing, feature extraction, and model evaluation using Git and GitHub for version control.
- Prepared technical reports and presentations using Matplotlib and Pandas for data visualization, enhancing communication of project findings.

Projects

Chatbot for College Information | *Python, NumPy, Pandas, Scikit-learn*
* Created a chatbot for retrieving college information using Python, NumPy, Pandas, and Scikit-learn, demonstrating practical application of AI technologies and data preprocessing techniques.

Dog Emotion Detection | *TensorFlow, Keras*
* Implemented a deep learning model using TensorFlow and Keras to detect dog emotions, improving understanding of animal behavior and model accuracy.

Boston Housing Price Prediction | *Regression Neural Networks, TensorFlow*
* Predicted housing prices using regression neural networks with TensorFlow, providing insights into real estate market trends and enhancing model predictive accuracy.

Education

Lakireddy Bali Reddy College of Engineering Mylavaram
B-Tech | CGPA: 8.68 *2023 – 2027*

Sri Chaitanya Junior College Guntur
Intermediate | Secured 97% *2021 – 2023*

Certifications

Oracle Generative AI Professional, 2025
Machine Learning Operations Engineer Associate – Microsoft, 2026
The Joy of Computing Using Python – NPTEL, 2025
AWS Certified Cloud Practitioner (2026–2029)

Achievements & Activities

LeetCode and GeeksforGeeks Enthusiast: Solved 150+ problems, enhancing problem-solving skills.

Hackathon Participant: Developed **Recruit Prep**, an AI-assisted interview preparation platform during a hackathon. Contributed to designing the application, integrating AI-powered features, implementing core functionalities, and presenting the final solution to judges.
